

Private Transport Service

(contingent on my availability)

Below are rates for private transport, provided by Jeff Coltenback, managing member, Coltenback Canine Services, LLC. We only transport one to three dogs at a time in my personal vehicle. Generally, this is a door to door service from/to North Carolina with a maximum of 700 miles from my home. However, I do not cross the Hudson River up north, so the five boroughs of New York are outside my scope of service and clients must meet me in New Jersey side of Hudson River. However, special accommodations can be made for an additional service charge (i.e. special needs dogs, lack of transportation, etc). This will be calculated on a case by case basis.

Private Transport Service 2025			
1st Dog	Additional dogs	Mileage (fed. rate)	Tolls (tbd after transport)
\$600.00	\$150.00	\$0.70	Examplee → from NC to NJ is approx \$40

Note: Mileage is roundtrip and cost is split between clients. So, if 2 organizations are transporting with me they will split the mileage cost.

If only one organization is transporting, then they are solely responsible for mileage cost.

Transport requirements

Transporting dogs interstate in the USA require a valid health certificate by a licensed Veterinarian from the departure state. Personally owned dogs (i.e. pets) are not required to have a health certificate to travel but do require a valid Rabies Certificate.

Check one of the lines below:

You agree to provide a valid health cert for interstate transport

OR

You hereby grant temporary and full ownership of dog to Jeff Coltenback for the duration of the transport (i.e. while I am travelling with your dog).
